

Science Allen Test - BIO

1. (3) 'a' and 'd'

2. (2) Water.

3. (1) Tallness is dominant over dwarfness.

4. (3) b, c

5. (4) Active Transport.

6. (1) Arteries.

21. The ~~plant~~ plants get the following raw materials for photosynthesis :-

i) Water :- Soil

ii) CO_2 :- Air

22

22. With the deficiency of the haemoglobin, oxygen cannot be transported around the body since there is no such thing that transport oxygen. Due to this, the person dies due to the lack of oxygen transported in the body.

27

27. The lungs are designed in a way to maximize area for exchange of gases. The ~~lungs~~ lungs

DATE: _____ PAGE: _____

have Alveoli ~~connecting~~ at the end of every bronchiole to ~~take up the~~ absorb the oxygen. ~~Alveoli~~ Alveoli covers up 80 sq. m^2 in the lungs which help in absorption of gases. The Bronchi is also divided to form Bronchioles which help in transporting oxygen to every part of the lungs.

28. (a) Liver ~~is~~ excretes Bile juice which helps in emulsification of Fats.

(b) Pancreas ~~excrete~~ excretes digestive enzymes which helps in breaking down ^{the} ~~can~~ nutrients in the ~~is~~ small intestine.

(c) Nutrition:- It is process of consuming and utilizing ~~at~~ the nutrients to ~~maintain~~ maintain the body.

Nutrition:- It is the food material that is consumed and utilized by the organism.

Holozoic Nutrition	Saprophytic Nutrition
1. The nutrients ^{food} are eaten in a raw form.	1. The nutrients ^{food} are eaten in an absorbed form.
2. The food is absorbed ^{decomposed} inside the body.	2. The food is absorbed ^{decomposed} outside the body.
Example :- Humans, Rabbits	Example :- Fungi, Mushrooms

29. Self-Pollination

1. ~~The Male gamete can be for~~

1. Occurs between the same ~~plant~~ flowers of the same plant or different flowers of same plant of same species

Cross-Pollination

1. Occurs between ~~the~~ ~~sp~~ flowers of the two different plants of the same species.

The agents that help in pollination can be divided into Biotic and Abiotic agents

i) ~~In Biotic~~ ^{Animals} Insects can be considered as Biotic agents that help in pollination.

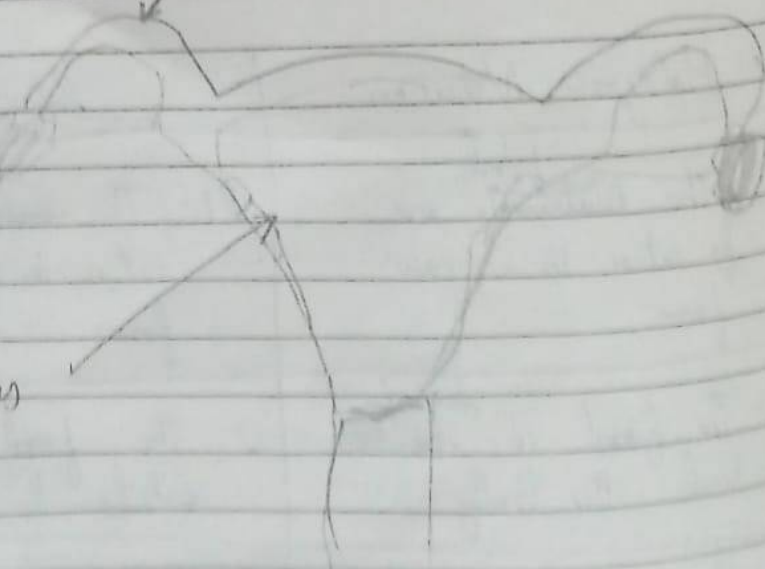

ii) ~~Wind water~~ Air & Water are abiotic agents that help in pollination.

34. i)

(b) Fallopian Tube

(a) Ovaries

(c) Uterus

DATE: _____ PAGE: _____
ii) If the human egg is not fertilized, then it comes out in the form of ~~blood~~ ~~with~~ ~~form of~~ ~~blood~~ ~~which~~ ~~is~~ ~~called~~ ~~menstruation~~.
the extra ~~uterus~~ ~~of~~ ~~uterus~~ lining in the form of blood which is called menstruation.

37 (i) → Mendel selected a pea plant for his experiments because of the following reasons:-

- a) Short life span - Results are out ~~fast~~ faster.
- b) Cross or self pollination - Different variety of experiments.
- c) Could be grown throughout the year - More experiments in a year.

(ii) Dominant traits are traits ~~are~~ that are visible to us. ~~is a~~

Recessive traits are traits that cannot be visible because of the dominant trait.

(iii) Colour of flower and ~~also~~ ~~also~~ ~~size~~ ~~colour~~ ~~of~~ ~~pod~~ ~~are~~ ~~are~~ ~~2~~ ~~visible~~ ~~traits~~ ~~that~~ ~~are~~ ~~in~~ ~~of~~ ~~garden~~ ~~pea~~.
are 2 visible traits ~~that are in~~ of garden pea.
