

Biology

Q1

Ans It passes neither through our liver nor pancreas.

Q2Ans Living beings consume Oxygen during respiration.

Q3Ans Bud develops due to repetitive cell division at a specific site.

Q4Ans Pisces only

Q5Ans Test tube B as pepsin can break proteins into simple molecules Only in acidic condition.

Q6Ans Both A and R are true ^{and} R is the correct explanation of A.

Q7Ans Both A and R are true ^{and} R ~~is~~ is correct explanation of A.

Q8Ans Rabbit, Frog, Deer belongs to same trophic level because they all are herbivorous

Q4

Ans In a human heart the Oxygenated blood is found in left Ventricular and left Atrium and deoxygenated blood is found in right Atrium and right Ventricle

Q10Ans Yellow - dominating Green - recessive
Round - dominating Green - recessive

Q11Ans

Ans Since the Male gamete have twenty four chromosomes. Therefore, the female gamete also contain same number of chromosomes i.e. - 24 -
the Zygote contain double number of chromosomes than the gametes

b)

(i) XX (ii) XY

Q12

(i)

Ans Pancreas is a gland that secretes the digestive enzymes as well as hormone

ii) if we take iodine in our diet low then the thyroid gland swells and results in the formation of 'goitre'.

Q13
 Ans.

the Mendel select a pea plant for his experiments because it has short life cycle and can be reproduce easily

(i)

the dominant traits are the traits which do not allow the recessive traits to show their effect in first generation whereas the recessive traits are the traits who do not show their effect under the influence of dominant trait in first generation.

(ii)

Round and wrinkled
 Yellow and green

Q14

a)

(i)

Ovary - It produces an egg every month

(ii)

Oviduct - It is a passage for egg to come from ovary to uterus. It is also known as fallopian tube

(b)

(i) if the uterus has to receive a zygote then it hardens the inner lining

(ii)

but if there was no fertilization take place it sheds off its lining and it is known as menstruation cycle.

Ans the function of placenta is to provide
as the material to the Zygote to become
fetus
