

BIOLOGY

6-

1. (3)

2. (4)

3. (4)

4. (i) Mice & Rabbit

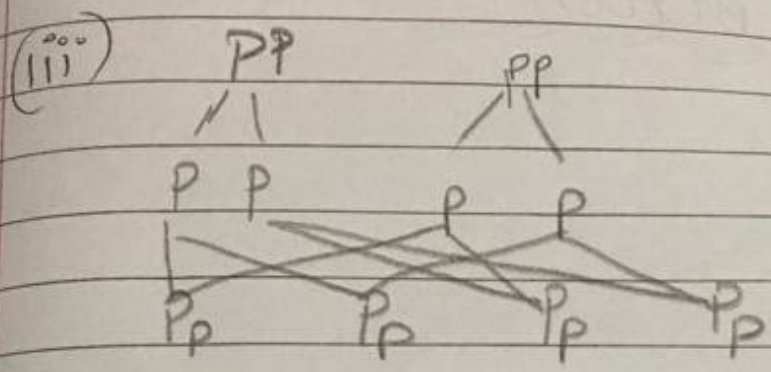

(ii) If all the foxes are killed due to a disease then the number of mice and rabbits will increase.

5. Mendel chose pea-plant for his experiments because:-

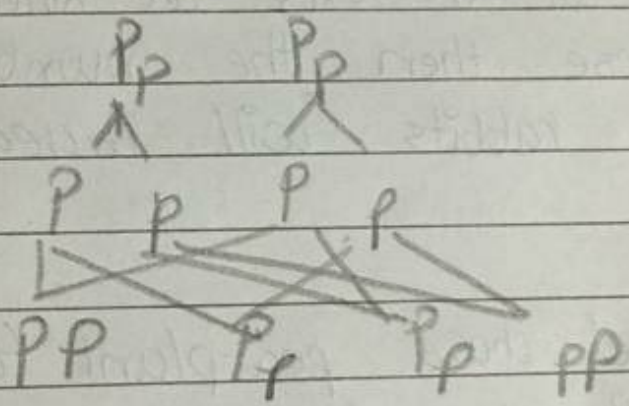

- They have long life span.
- They have $\geq$ contrasting traits.
- They can undergo self & cross pollination.

6. (i) ~~Her male~~ The child will be a female

(ii) Variation in a species promotes survival because it helps organisms to survive environmental changes.

The phenotype feature of F_1 generation is that all the plants will have pink coloured flowers.

The phenotypic ratio of F_2 generation is :- 1 : 2 : 1
