CHEMISTRY

1. Two strong acids are - Hydrochloric acid (HCl) and sulphuric acid (H_2SO_4).
2. Turmeric paste is used as an indicator to indicate whether a solution is acidic or basic. It turns reddish-brown in basic solution and remains yellow in acidic solution.
- 3(a) When an acid reacts with metal it forms metal salt and releases H_2 gas.

- (b) H_2 gas is liberated during above reaction.
