

Chemistry :-

Q 17

→ PbS - Reductant ; H_2O - Oxidant.

Q 27

→ $\text{CaCO}_3, \text{Ca(OH)}_2$

Q 37

→ $\text{NaCl (x)}, \text{CO}_2 (\text{y})$

Q 47

→ $\text{CaCO}_3, \text{CO}_2, \text{NaHCO}_3, \text{NaCO}_3$

Q 57

→ 8

Q 67

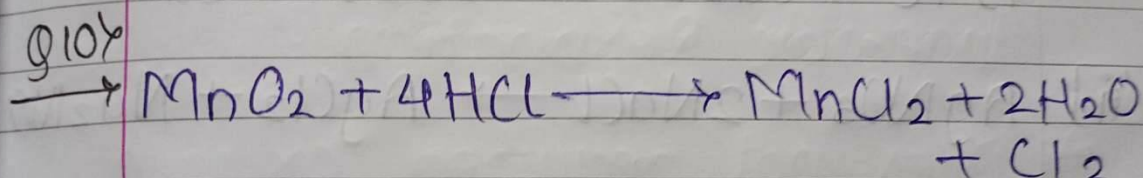

→ $\text{NaHCO}_3, \text{CO}_3$

Q 77

→ $\text{B} > \text{A} > \text{C}$ - decreasing acidic strength.

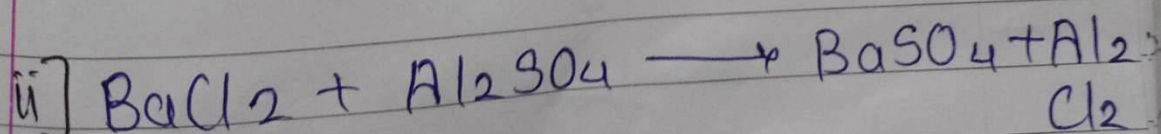

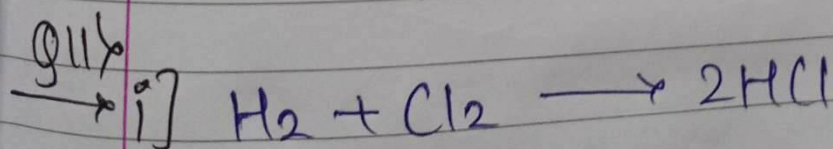

Q 88
 Both A & R are true, & R is not correct explanation of A.

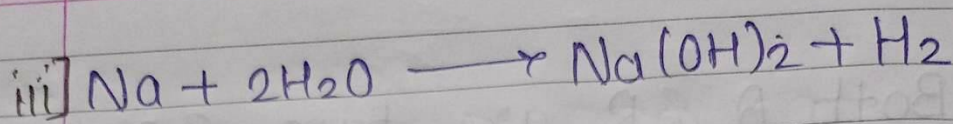

Q 99
 Alkali substance are those bases which are soluble in an aqueous medium.

In the given reaction,

- MnO_2 is reduced
- HCl is reducing agent
- HCl is oxidized
- MnO_2 is oxidizing agent

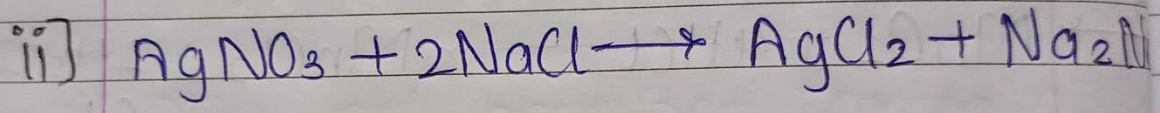

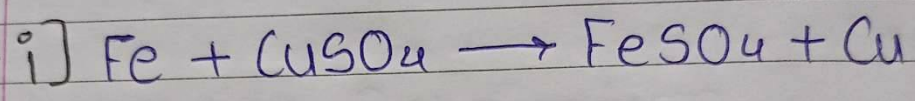

Q12)

X is calcium carbonate.
Y is slaked lime
G is chlorine gas

Q13)

iii] Barium sulphate decompose of addition of HCl. It decompose & Form Barium chloride
