

3/9/23

Chemistry

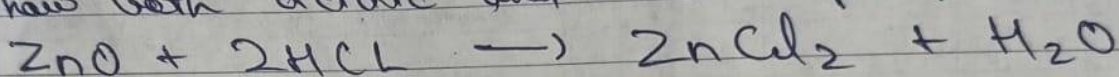

1. (2) White, BaSO_4

2. (3) Turns red litmus blue

3. (1) Both Assertion and Reason are correct and reason is correct explanation of Assertion

4. (3) Assertion is True but Reason is false

5. Amphoteric oxides are substances which show both acidic and basic properties.

~~6. In Beakers which contains copper will only show displacement reactions with FeSO_4 solution.~~

6. In beakers which contains strips of aluminium and zinc will only show displacement reactions with FeSO_4 solution.

7. $\text{FeSO}_4 \cdot 7\text{H}_2\text{O} \xrightarrow{\Delta} \text{Fe}_2\text{O}_3 + \text{SO}_2 + \text{SO}_3$
The color of solid product formed is white.

8. (a) $\text{Zn} + 2\text{HCl} \rightarrow \text{ZnCl}_2 + \text{H}_2$
Zn displaces Chlorine from HCl and forms ZnCl_2 with release of Hydrogen gas.

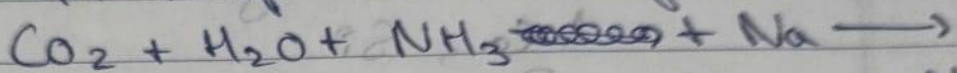

Q9

9. Salt name is Baking Soda

Uses:-

i) It is used to make food at home, which provides fluffiness to cake and crisp things.

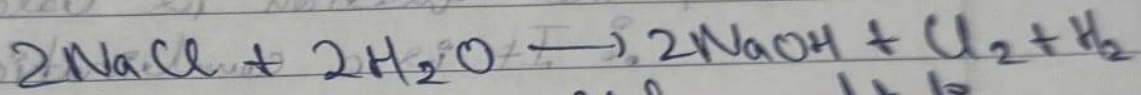

ii) Also used in cleaning at homes, in soap and detergents.

10(a)

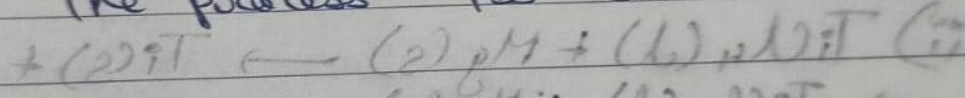

10(a)

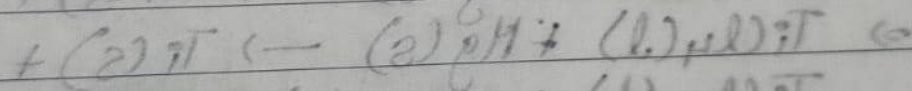

The process is Chlor-alkali

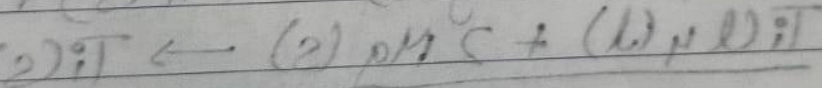

Q10

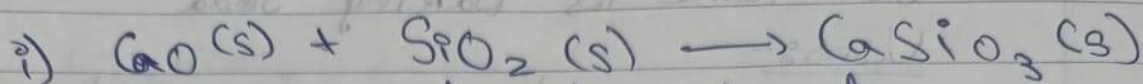

Q11

Q12

11° Ques:-

Equation is already balanced as on left side there is:

1 Ca, Si

3 O

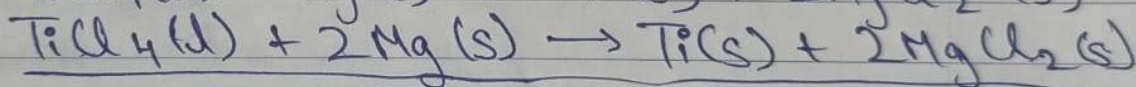

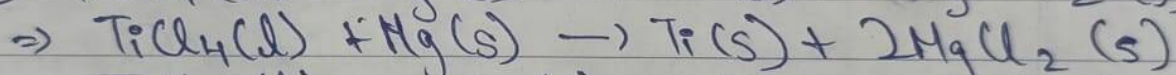

and on right side

1 Ca, Si

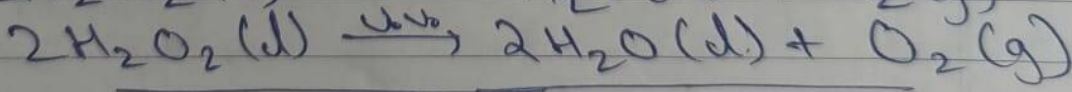

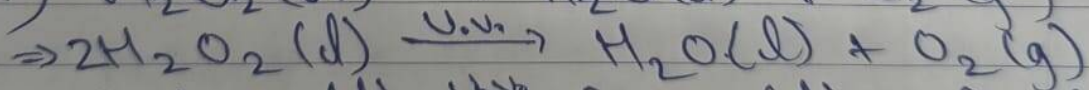

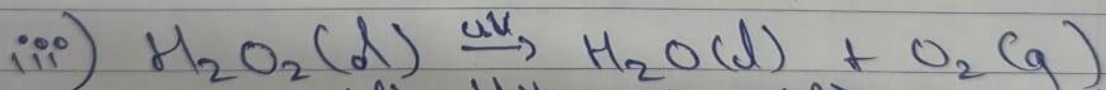

3 O

So, the equation is balanced

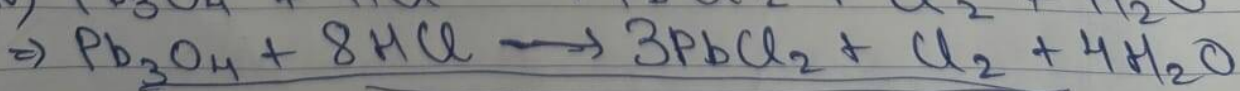

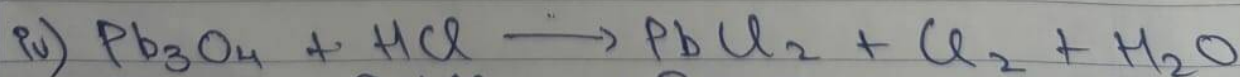

It is a combination reaction

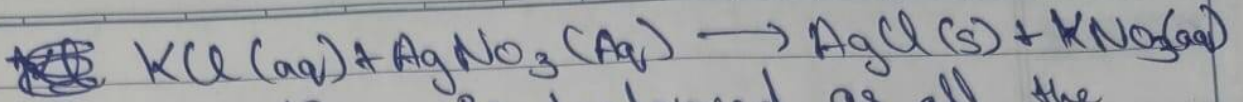

It is a displacement reaction

It is a decomposition reaction

It is a double displacement reaction

The equation is balanced as all the coefficients are same and values also same.

∴ It is a double displacement reaction.
