

* Biology

Q1. (4) It passes neither through our liver nor pancreas.

Q2. (3) Water vapours produced by living beings prevent burning of candle.

Q3. (2) Bud develops due to repetitive cells division at a specific cells.

Q4. (4) Pisces only.

Q5. (2) Test tube B as HCl will breakdown protein into simple molecules.

Q6. (1) Both (A) and (R) are true, and (R) is the correct explanation (A).

Q7. (3) (A) is true and (R) is false.

Q8. Here, grass is a producer, rabbit is a carnivore, and vulture is also a carnivore.

So, Rabbit and Vulture are herbivores.

So they belong to same trophic level.

Q9. * Oxygenated blood $\Rightarrow$ left atrium & left ventricle.
* Deoxygenated blood $\Rightarrow$ right atrium & right ventricle.

Q10 (a) Yellow seeds $\Rightarrow$ Dominant,
Green $\Rightarrow$ Recessive.

(b) Round $\Rightarrow$ Dominant,
Wrinkled $\Rightarrow$ Recessive.

Q11 (a) 24 chromosomes are present.
Total also 24.

(b)

- (b) (i) female child $\Rightarrow XX$
(ii) male child $\Rightarrow XY$

Q12. (a) The glands secrete digestive enzymes as well as hormones is the pancreas.

(i) If Iodine deficiency is present in their diet, they will be thyroid diseases, weight gain.

Q13. (a) Mendel selected pea plant for his experiment because of pea plant grows easily in few days and many generations can be examined by Mendel in few days or months.

(b) An allele of a gene is said to be dominant when it effectively overrules the other (recessive) allele.

(c) Pea shape (round or wrinkled)
Pea color (green or yellow)

Q14. (i) Plastic cups are non-biodegradable & harm the environment. ~~It~~
They were replaced by Kullhads, it also leads to ~~loss~~ loss of soil fertility.

(ii) Mucus prevents the inner lining of the stomach from the action of hydrochloric acid & ~~the~~ enzyme pepsin. It can lead to acidity & ulcers.
