

1

Two strong acids are HCL & HNO_3

HCL - Hydrochloric Acid
 HNO_3 - Nitric Acid

2. A turmeric indicator is a type of natural indicator.

Acid $\therefore$ No colour change

Base $\therefore$ Red & Brown colour

3. a) When acid reacts with metal metal salt is formed along with H_2 gas evolve. for
 Eg $\therefore \text{Zn} + \text{HCL} \rightarrow \text{ZnCl}_2 + \text{H}_2 \uparrow$

b) H_2 gas is liberated during above reaction.

In order to check the presence of H_2 gas bring matchstick near test tube having fumes of it. It burns with a pop sound.
