

1.

Two strong acids are HCl & HNO_3

HCl - Hydrochloric Acid
 HNO_3 - Nitric Acid

2. A turmeric indicator is a type of natural indicator.

Acid $\rightarrow$ No colour change

Base $\rightarrow$ Red & Brown colour

3. a) When acid reacts with metal metal salt is formed along with H_2 gas evolve. for
 Eg:- $\text{Zn} + \text{HCl} \rightarrow \text{ZnCl}_2 + \text{H}_2 \uparrow$

b) H_2 gas is liberated during above reaction.

In order to check the presence of H_2 gas bring matchstick near test tube having fumes of it. It burns with a pop sound.
