

$$\frac{2p}{2} = \frac{3}{1}$$

$$p = 3$$

10. Given

$DP \parallel BC$

$$\frac{AD}{DC} = \frac{CE}{BE}$$

To Prove that
 $EP \parallel AC$

Statement	Reason
$DP \parallel CB$	Given
$\frac{AD}{DC} = \frac{AP}{PB}$ ①	Basic Proportionality Theorem
$\frac{AD}{DC} = \frac{CE}{BE}$ ②	Given
From ① and ②	
$\frac{AP}{PB} = \frac{CE}{BE}$	
Since $\frac{AP}{PB} = \frac{CE}{BE}$	Converse of Basic Proportionality Theorem
$EP \parallel AC$
